

CANVAS - Analytics

Track student usage to promote student success

PURPOSE

Analytics allows instructors to track individual student's usage of Canvas, assignment submissions, communications with instructor, and grade information. This is essential when meeting with students and guardians about student success and goal setting.

LOCATION

Information regarding all roles connected to a Canvas course is located under the **People** option from the course menu.

1. Click on People to observe course roster.
2. Select a student name and a snapshot window will appear on the right side of the screen.
3. Select **Grades** or **Analytics** within the snapshot window to observed detailed information about student usage.

The screenshot shows the Canvas course interface. On the left is a red navigation sidebar with icons for Account, Dashboard, Courses, Calendar, Inbox, Commons, and Help. The main content area is titled 'COURSE TITLE > People'. Below the title, there are filters for 'Everyone' and 'Groups', a search bar, and a dropdown for 'All Roles'. A list of students is displayed, with the first student, 'AUDRA ARMAN-RICHARDSON', highlighted. A red circle '1' is around the 'People' menu item in the sidebar. A red circle '2' is around the student's name in the list. A red circle '3' is around the 'Analytics' button in the student's profile snapshot window on the right. The snapshot window shows the student's name, course title, last login date, and buttons for 'Grades' and 'Analytics'. Below these are statistics: 100% Grade, 0 Missing, and 4 Late. A 'Last 9 Graded Items' section shows a bar chart with all items at 100%. At the bottom, 'Activity Compared to Class' shows Participation as 'Low' (3 stars) and Page Views as 'Moderate' (4 stars).

CANVAS - Analytics

Track student usage to promote student success

FEATURES

Analytics provides student data connected to four sections. Each section provides a snapshot of student performance in a Canvas course.

ACTIVITY BY DATE

View number of pages viewed and actions taken (i.e. responding to a discussion or submitting an assignment) by date.

COMMUNICATION

Track the number of emails sent to course instructor and the number of responses sent by course instructor.

SUBMISSIONS

Observe number of assignments submitted by student and whether submissions were made on time, late, or missing.

GRADES

Track student performance in comparison to peers within the course.

Envelope icon allows you to message a student directly.

Use **arrows** to easily toggle to the next student(s).

Adjust view to list view using the button provided.

Hover over or select a data point for **detailed information**.

Learn more by watching the Canvas instructional video called [Courses and Student Analytics Overview \(Instructors\)](#).
